

COVID PROTOCOL FOR ENTRY TO GOODISON PARK

In light of the recently updated COVID-19 restrictions, I just wanted to inform you that as of Wednesday 15th December all football fans attending any stadium in England **MUST** be ready to show either their vaccine passport or a negative lateral flow test ideally within 12 hours of arrival and at a maximum of 48 hours before your arrival. Any supporter who is unable to provide either of these requirements will be refused entry into any stadia.

All supporters attending any football fixture must complete a self-certification form (this was sent to all Season Ticket Holders on 14 Dec) confirming if they have or have not been vaccinated. Once a Season Ticket holder has filled out the form in it will then be then valid for the remainder of the season. Any supporter who has **NOT** been vaccinated **MUST** provide a negative lateral flow test 48 hours prior to the fixture.

All Supporters Club chairpersons, secretaries or treasurers who purchase home or away tickets on behalf of their members **MUST** certify that all supporters they are purchasing on behalf of have either been vaccinated or will be able to provide proof that they have taken a negative lateral flow test 48 hours prior to the fixture. If a supporter is refused entry into any stadia because they are unable to provide proof of their vaccine passport or negative lateral flow they will **NOT** be entitled to any refund.

Please note any supporter who is exempt from the COVID vaccination will still be required to provide a negative lateral flow test in order to enter any stadium.
